Namaske Lake Abutter,

The Namaske Lake Association has contracted Aquatic Control Technology, 11 John Road, Sutton, MA 01590-2509, Telephone (508) 865-1000, to treat portions of Namaske Lake in Goffstown with USEPA/State registered herbicide Renovate MaxG (2,4-D & Triclopyr) EPA Registration Number 67690-50 or Sculpin G (2,4-D granular) EPA Registration Number 67690-49, to control exotic variable milfoil weed.

A permit application has been filed with the state requesting approval for this treatment program. The treatment will likely be performed in mid June or early September 2013. If a permit is issued, there will be additional notification of the actual treatment date and specific information on certain activities and water uses that will be temporarily restricted as a condition of the permit. Any questions concerning the proposed treatment should be directed to Aquatic Control Technology at the above address.

Those wishing to comment on the proposed application may contact the New Hampshire Department of Agriculture, Division of Pesticide Control to request a public hearing. Comments must be received in writing within 15 days of receipt of this notice.

Concord, NH 03302-2042
(603) 271-3550

The treatment is tentatively scheduled for mid June or early September 2013. Based on past experiences, we expect that the State will impose restrictions on the use of treated pond water for drinking and irrigation purposes. The specific use restrictions will be determined at the time the permit is issued and will be communicated directly to you in the notification of treatment that will be sent by certified-mail.

The restrictions extend to direct water intakes located within 1,200 feet of the treatment areas and to wells within 50 feet of the treatment areas. **Intakes (black pipe) that draw water directly from Namaske Lake within 1,200 feet of proposed treatment areas WILL be subject to irrigation and drinking restrictions.** If you have a well within 50 feet of the lake or an intake, please let us know by calling our office weekdays at (508) 865-1000 or by emailing mbellaud@aquaticcontroltech.com. Please be sure to reference **Namaske Lake** in your email.
