Conservation Commission Charter and Meetings

The Conservation Commission addresses a wide range of issues for the town and residents, providing support and recommendations to the town Planning Board on subdivision and site plan applications. It conducts site inspections, reviews wetland activity requests submitted to the NH Department of Environmental Services and other agencies, and oversees a variety of town improvement projects.

The Commission normally meets the fourth Wednesday of each month at 7 PM in the Mildred Stark room in downstairs Goffstown Town Hall.

All commission meetings are open to the public, and residents are encouraged to attend. Your input is important!
