[List of items that MUST be Brought to Transfer Station](images/stories/Public_Works/BROCHURE-TriFold-ZeroSort-2016_press2%20REV.pdf) (Items are NOT acceptable in either the green trash barrel or the blue recycle barrel, some items may require a disposal fee)

### Simple Steps to Prepare Recyclables

- GLASS - Clear, brown and green should be rinsed clean.
- ALUMINUM, TIN and STEEL CANS should be rinsed clean.
- PLASTIC should be rinsed clean. **ALL PLASTICS MUST HAVE:** the recycling symbol and the #1 - #7 clearly marked on the item to be recycled.
- ASEPTIC PACKAGING such as juice boxes and milk completely emptied and rinsed if possible.
- CORRUGATED CARDBOARD should be flattened inside the recycling barrel. Corrugated cardboard consists of cardboard where the center layer is ridged.
- MIXED PAPER such as junk mail, magazines, newspaper, cartons and office paper are accepted. As a general rule "if it tears, it's paper" and can be recycled. Packages partially comprised of foil, blueprints, and food soiled paper (such as napkins and paper plates) are excluded.

◆

The Goffstown Transfer Station Facility *does not* provide pick up service for bulky waste, such as furniture, appliances, yard waste, Christmas trees, etc.
